

el::base::StaticClass

```
classDiagram
    class StaticClass["el::base::StaticClass"]
    class File["el::base::utils::File"]
    File --|> StaticClass
```

The diagram shows a class hierarchy. The base class, 'el::base::StaticClass', is represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the middle and bottom compartments are empty. The derived class, 'el::base::utils::File', is represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment contains a list of seven public methods, each preceded by a '+' sign. A red arrow with an open triangular head points from the top of the 'el::base::utils::File' class to the bottom of the 'el::base::StaticClass' class, indicating inheritance.

el::base::utils::File
